

# Season's Greetings from the STEAM&Sports Project!

*"Where Science meets Sports!"*

2025 has been an extraordinary year! Together, we:

- ✓ Launched the **STEAM & Sports Teaching Guide**, packed with innovative lesson plans.
- ✓ Piloted **hands-on experiences** that brought science, technology, engineering, arts, and math to life through sports.
- ✓ The development of our **interactive mobile app**, making learning fun and accessible anywhere.
- ✓ Connected educators and students across Europe through dynamic training and collaboration.

Thanks to your support, we've empowered hundreds of learners and teachers to embrace creativity, inclusion, and active learning.

**Happy Holidays and a New Year full of innovation and teamwork!**
